IPO PRESENTATION 2018
HUNTING HIGH-GRADE GOLD DEPOSITS IN WEST AFRICA
This Presentation ("Presentation") is for informational purposes only and is not a prospectus, disclosure document or offer document under the Corporations Act 2001 (Cth) ("Corporations Act") or any other law. This Presentation does not constitute, and is not to be construed as, an offer to issue or sell, or a solicitation of an offer or invitation to subscribe for, buy or sell securities in Mako Gold Limited ACN 606 241 829 ("Mako"). Recipients should read Mako’s Prospectus dated 19 January 2018 carefully and in its entirety before making a decision to invest. In particular, recipients should read and consider the risks outlined in section 5 of the Prospectus. A copy of Mako’s Prospectus may be viewed online at www.makogold.com.au. Applications for shares can only be made via the application form that is attached or accompanying the Prospectus.

This Presentation does not purport to contain all information that recipients may require to make an informed assessment of Mako or its securities. Statements in this Presentation are made only as at the date of this Prospectus unless otherwise stated and remain subject to change without notice. No representation or warranty, express or implied, is made as to the fairness, accuracy or completeness of the information or opinions contained in this Presentation, or any omission from this Presentation. To the maximum extent permitted by law, Mako disclaims any responsibility to inform any recipient of this Presentation on any matter that subsequently comes to its notice which may affect the information contained in this Presentation, and undertakes no obligation to provide any additional or updated information whether as a result of new information, future events or results or otherwise.

This Presentation contains forward-looking statements regarding Mako and the potential of its current and future projects. Forward-looking statements can be identified by the use of forward-looking language such as "plans", "expects", "budgets", "schedules", "forecasts", "anticipates", "believes", or variations thereof, and statements that certain actions or results "may", "could", "would", "might", "will occur" or "will be achieved". Forward-looking statements are based on the opinions and estimates of Mako as at the date such statements are made. Forward-looking statements are subject to known and unknown risks that may cause the actual results, performance or achievements of Mako to be materially different from those expressed or implied by such forward-looking statements. Although Mako has attempted to identify and account for these risks, there can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, Recipients should not place undue reliance on forward-looking statements contained in this Presentation. Mako does not undertake to update any forward-looking statements except in accordance with applicable securities laws.
INVESTMENT OVERVIEW

- New gold exploration company with highly prospective projects in Côte d’Ivoire and Burkina Faso, West Africa
- Led by a team of experienced mining industry professionals with a proven track record of gold discoveries in Burkina Faso and mine development and production in Australia
- Quality projects were selected for potential to host several, multi-million ounce gold deposits in the world-class Birimian greenstone belts
- IPO to raise $6M, (min. $5M) at $0.20 per Share with ASX listing expected late March 2018
- One attaching listed 3-year Option exercisable at $0.30 for every 2 Shares subscribed for
- $2M IPO cornerstone investment from Resolute Mining Limited (ASX:RSG)
EXPERIENCED BOARD AND MANAGEMENT

THE BOARD

Dr Mark Elliott
Non-Exec. Chairman
Geologist with 40 years’ experience in exploration, mining and development. Previous MD and Chairman roles with various ASX resource companies. Currently on boards of ASX-listed Nexus Minerals Ltd and Aruma Resources Ltd.

Peter Ledwidge
Managing Director
Geologist with 30 years’ experience in exploration and mining. Previous key management roles with Orbis Gold Ltd leading to its successful take-over by TSX-listed Semafo. Fluent in French. Many government and business contacts in West Africa.

Michele Muscillo
Non-Exec. Director
Partner Hopgood Ganim Lawyers. Extensive experience in IPO’s, mergers, and acquisitions. Former Director of Orbis Gold Ltd. Currently on boards of ASX-listed Aeris Resources Ltd, Xanadu Mines Ltd and Cardinal Resources Ltd.

Paul Marshall
Comp. Sec. & CFO
Accountant with 30 years’ experience, including more than 20 as Company Secretary and CFO for various companies, mostly in the resources sector. Experienced in all aspects of financial reporting, corporate governance, capital raising and company listings.

Michele Muscillo
Managing Director
Non-Exec. Director
Partner Hopgood Ganim Lawyers. Extensive experience in IPO’s, mergers, and acquisitions. Former Director of Orbis Gold Ltd. Currently on boards of ASX-listed Aeris Resources Ltd, Xanadu Mines Ltd and Cardinal Resources Ltd.

Ann Ledwidge
Gen Mgr. Exploration
Geologist with over 25 years’ experience in gold and base metals exploration. Led the team which discovered the 2 Moz Natougou deposit for Orbis Gold Ltd. Advanced Nabanga to resource stage and Natougou to Scoping Study.

Ibrahim Bondo
Country Manager
Manager with 20 years’ technical, logistical and business development experience in mineral exploration in West Africa. Was an integral part of the Orbis Gold team. Has excellent contacts with West African government officials as well as in the private sector.

Jamie Light
Chief Geologist
Geologist with 20 years’ multi-commodity experience in North America and Africa. Strong background in greenfields to advanced gold and base metal exploration. Excellent mentoring skills with young geologists. Was an integral part of the Orbis Gold team.
MAKO’S MD & GM EXPLORATION - PROVEN TRACK RECORD IN WEST AFRICA

PREVIOUS SUCCESS WITH ORBIS GOLD

• Acquired Orbis Gold’s permit portfolio in Côte d’Ivoire and Burkina Faso
• 3 greenfield gold discoveries in 3 years in Burkina Faso
• Discovered two high-grade deposits totalling 2.6Moz gold
• Advanced projects rapidly - Natougou deposit (now the SEMAFO Boungou Mine) is under construction

KEY ATTRIBUTES

• 18 years combined West African experience
• Both fluent in French (Official language of Côte d’Ivoire and Burkina Faso)
• Worked together as successful team for 25 years

Mako Managing Director (top), and Mako General Manager Exploration (below) in West Africa.
## IPO OFFER

- Artisanal Mine Site
- RAB gold trend
- Major fault
- Shear zone
- Secondary fault

Favourable Gold-bearing Geological Units (interpreted from geophysics)
NAPIÉ PROJECT – DRILL TARGETS PRIORITISED ON COINCIDENT ANOMALIES

Permit has potential to host multiple large gold deposits

Data used for defining drill targets...

- 25km gold soil and/or auger anomaly
- 11km gold RAB mineralised corridor
- Rock chip samples up to 59g/t Au
- Structural targets
- Favourable geological units
- Artisanal gold mining sites
BURKINA FASO – A PROVEN GOLD DESTINATION

- Modern mining code (2015)
- 10 new gold mines in past 12 years
- 5 new gold mines under development or construction
- International mining presence:
  - IAMGOLD
  - Nordgold
  - Centamin
  - B2Gold
  - SEMAFO
  - Endeavour
NIOU PROJECT – RECENT EXPLORATION

Mako has completed prior to IPO...

- Airborne geophysical survey and interpretation over entire permit
- Preliminary mapping/rock chip sampling of main artisanal mining site
- A trenching program on periphery of artisanal mining sites
NIOU PROJECT – EXTENSIVE ARTISANAL MINING

- Multiple high-grade rock chip samples from mining spoil piles and trenches
- No known previous drilling

Gold in Quartz from Niou Artisanal Site

**ROCK CHIP RESULTS**

- **NUTR001**
  - 0.33g/t Au
  - 0.54g/t Au
  - 10g/t Au

INVESTMENT HIGHLIGHTS

• Team with proven track record of making significant gold discoveries
• Management selected projects in West Africa with the potential to host multiple, large, high-grade gold deposits
• IPO to raise up to A$6M with listing on ASX in late March 2018
• Additional value offered to IPO investors by issuing 1 attaching Option for every 2 Shares subscribed for
• $2M IPO cornerstone investment from ASX-listed Resolute Mining
• Drilling planned to commence on at least two projects immediately following listing
## RISKS ASSOCIATED WITH THE OFFER

| Exploration and Evaluation Risk | Potential investors should understand that mineral exploration and development are high risk undertakings. While the Company has attempted to reduce this risk by selecting projects that have identified advanced mineral targets, there is still no guarantee of success. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically exploited. It is impossible to ensure that the exploration or development programmes planned by Mako Gold will result in profitable commercial mining operations. The circumstances in which a mineral deposit becomes or remains commercially viable depend on a number of factors. These include the particular attributes of the deposit, such as size, grade and proximity to infrastructure. A combination of these factors may result in projects not being developed, or operations becoming unprofitable. Furthermore, should Mako Gold be unable to secure new exploration areas and resources, there could be a material adverse effect on the Company’s prospects for mineral exploration and its success in the future. |
| Contractual Risks | The Company’s interests in the Niou and Tangora permits in Burkina Faso, and the Napié Permit in Côte d’Ivoire, are by virtue of contractual rights under the Option Agreements (summarised in sections 9.2 and 9.3 respectively of the Prospectus) in respect of the Burkina Faso permits, and the Farm-in Agreement (summarised in Section 9.1 of the Prospectus) in respect of the Côte d’Ivoire permit (collectively the Relevant Agreements and each a Relevant Agreement). Accordingly, as in any contractual relationship the ability of the Company to be registered as the holder of an interest in the Burkina Faso permits and the Napié Permit is dependent upon the respective holders of the Burkina Faso permits and the Napié Permit complying with their contractual obligations to deliver title in accordance with the Relevant Agreements. To the extent that a permit holder defaults on their obligations under a Relevant Agreement, it may be necessary for the Company to approach a court in the relevant jurisdiction to seek a legal remedy. Such legal action may be costly and no guarantee can be given by the Company that a legal remedy will ultimately be granted or whether the terms of such a legal remedy will be sufficient. |
| Côte d’Ivoire Contract Risk | The Company’s interest in the Napié Permit is summarised in Section 9.1 of the Prospectus. The holder of the Napié Permit, Occidental Gold SARL (Occidental) has negotiated a joint venture agreement with the African American Investment Fund SARL (AAIF) (AAIF JV Agreement), but the AAIF JV Agreement remains unsigned. The Company is entitled under the Farm-in Agreement to earn an interest in the Napié Permit regardless of whether or not the AAIF JV Agreement is entered into. On execution of the AAIF JV Agreement (on its proposed terms), AAIF will have a contractual right to earn a 10% participating interest in the Napié Permit which will be free carried until the completion of a feasibility study which demonstrates that it is commercially feasible to develop a mining project. As the Company is not party to the negotiations and will not be a party to the AAIF JV Agreement, it has no input into that document. The Company is entitled under the Farm-in Agreement to earn an interest in the Napié Permit regardless of whether or not the AAIF JV Agreement is entered into. To the extent that AAIF and the Napié Permit holder enter into the AAIF JV Agreement in different terms this may have an impact on the Farm-in Agreement generally and in particular require the Company to seek to enforce its rights under that document. On the AAIF JV Agreement being entered into, any default by the parties to that document could indirectly have an adverse impact on the exercise of rights of the Company under the Farm-in Agreement to the extent that Occidental or the Permit is affected. Such events will be outside of the control of the Company because it is not a party to the AAIF JV Agreement. |
## RISKS ASSOCIATED WITH THE OFFER

<table>
<thead>
<tr>
<th>Risks</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Permit Risks</td>
<td>The rights to mineral permits carry with them various obligations which the holder is required to comply with in order to ensure the continued good standing of the permit and, specifically, obligations in regard to minimum expenditure levels and responsibilities in respect of the environment and safety. Failure to observe these requirements could prejudice the right to maintain title to a given area and result in government action to forfeit a permit or permits. There is no guarantee that current or future exploration permit applications or existing permit renewals will be granted, that they will be granted without undue delay, or that the Company can economically comply with any conditions imposed on any granted exploration permits.</td>
</tr>
<tr>
<td>Financing</td>
<td>The Company’s ability to effectively implement its business strategy over time may depend in part on its ability to raise additional funds. There can be no assurance that any such equity or debt funding will be available to the Company on favourable terms or at all. If adequate funds are not available on acceptable terms, the Company may not be able to take advantage of opportunities or otherwise respond to competitive pressures. Although the Directors believe that on completion of the Offer the Company will have sufficient working capital to carry out its short-term business objectives, there can be no assurance that such objectives can be met without further financing or, if additional financing is necessary, that financing can be obtained on favourable terms or at all. Further, if additional funds are raised by issuing equity securities, this may result in dilution for some or all of the Shareholders.</td>
</tr>
<tr>
<td>Land Access Risk</td>
<td>Land access is critical for exploration and evaluation to succeed. In all cases the acquisition of prospective permits is a competitive business, in which proprietary knowledge or information is critical and the ability to negotiate satisfactory commercial arrangements with other parties is often essential. Access to land for exploration purposes can be affected by small non-mechanised mining operations or land ownership, including registered and unregistered land interests and regulatory requirements within the jurisdiction where the Company operates.</td>
</tr>
<tr>
<td>Reliance on Key Personnel</td>
<td>While the Company is pursuing its exploration and evaluation programs within the time frames and within the costs structure as currently envisaged it could be dramatically influenced by the loss of existing key personnel or a failure to secure and retain additional key personnel as the Company’s exploration programs develop. The resulting impact from such loss would be dependent upon the quality and timing of the employee’s replacement. Although the key personnel of the Company have a considerable amount of experience and have previously been successful in their pursuits of acquiring, exploring and evaluating mineral projects, there is no guarantee or assurance that they will be successful in their objectives pursuant to this Prospectus.</td>
</tr>
</tbody>
</table>
WHAT’S IN A NAME?

The mako shark is the fastest shark in the ocean and is highly successful in its hunt for prey.

It roams the open ocean in search of the best opportunities and is commonly found off the African continent.

Mako Gold aims to live up to the reputation of its namesake by moving quickly and securing its prey – large, economic gold deposits in West Africa.
