8.8 If Item 8.7 is less than 2 quarters, please provide answers to the following questions:

- Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?

Answer: No

In response to the COVID-19 crisis, Mako Gold has implemented the following changes in order to mitigate potential personal and financial risks associated with the pandemic:

- Offices have been closed in Australia and West Africa and employees are working from home.
- Field work is suspended at the Napié Project in Côte d'Ivoire until it is safe to resume activities (no work is currently planned on the Niou Project in Burkina Faso).
- All Directors' salaries and fees, including the Managing Director have been deferred. Deferred salaries will be reimbursed at a later date in either cash and/or shares.
- Senior Management salaries have been reduced by 50%, with the remaining 50% deferred under the same terms as directors.
- All non-essential expenditures have ceased.

Taking into account the reduced expenditures due to COVID-19 the company has sufficient cash resources to meet the next two quarters planned expenditures.

2. Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: The company has since the end of the reporting period announced it has signed a binding term sheet to sell its Niou project in Burkina Faso for USD\$700,000. The company is also investigating the potential for both a near term capital raising in order to ensure it is in a position to quickly recommence field activities on its Napie project once access restrictions due to COVID-19 have been relaxed.

3. Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: Yes - taking into account the sale proceeds for the Niou project and reduced expenditures due to COVID-19 the company has sufficient cash resources to meet the next two quarters planned expenditures. During this period detailed analysis of data from fieldwork to date will enable the next drill targets to be identified and a drill program planned.
